### 2024 Performance:

of target

**162,007** people get access to safe and nutritious food.

**108,006** people get donated food.

**54,001** members of Community Kitchen

## Opportunities and Challenges

Food security has become a growing concern for organizations worldwide. According to the Food and Agriculture Organization of the United Nations (FAO), over 25.96% of the global population is currently facing food insecurity. This issue has been further exacerbated by the COVID-19 pandemic, the intensifying impacts of climate change—which continue to disrupt agricultural output—and growing challenges in food logistics, driven by rising fuel costs and ongoing geopolitical conflicts. Food security is one of our core strategies, the Company recognizes the importance of this issue and is committed to taking on social responsibility as the leading food supply chain.

## Policy & Management Approach

In addition to managing the supply chain to nourish adequate food to meet customers' needs, the Company also expands food-accessible opportunities for people affected by crisis, local communities, and vulnerable groups, by delivering food, increasing access to safe food, and sharing food production knowledge through many projects.
